“ **Please note:** CEMOTO currently publishes a **single shared owner manual covering the D-series** (D02 and D03). It is listed on the store as separate D02 and D03 entries, and both files cover the same D-series content: safety and prevention, assembly, start and run, display, fault display, settings, maintenance, troubleshooting and warranty.

The D-series manual is an illustrated 28-page document. Because the pages are image-based, the text below summarizes its contents so you can search it.

eBikes, e-scooters and folding models

Model	Manual
B57A (folding eBike)	CEMOTO B57A User Manual (PDF)
EM11	CEMOTO EM11 User Manual (PDF)

The B57A manual is titled *Electric Bike B09A-750* internally and covers the shared CEMOTO folding eBike platform: purpose and benefit of the booklet, pre-ride knowledge, assembly instructions, operation, battery and charger guidance, maintenance and safety warnings.

The official D-series owner manual is organized into ten sections:

3. Start and run	Pre-departure inspection and guidance, start-up methods

Sections 2, 4, 5, 6 and 9 are reproduced and expanded in this documentation center:

- Assembly → [Unboxing & Assembly](#)
- Display and keys → [Display & Settings](#)
- Fault codes → [Display & Error Codes](#)
- Troubleshooting → [Troubleshooting](#)
- Warranty → [Warranty](#)

Reading the manual on an image-based PDF

The D-series PDF is a scanned/illustrated document, so text search and copy-paste do not work reliably. Two practical options:

1. **Use this documentation center**, which reproduces the text content in searchable form.
2. **Use the assembly and technical videos** — see [Technical Guides](#).
